

Data transfer for digital prints and foil plot:

Data format:

PDF

Page format:

The page format must be 1:2, 1:4, or 1:10.
Please keep the correct aspect ratio

Print data:

For good results the image resolution should be set at max. 150 dpi (ref. to output size),
at least 100 dpi

Colour model:

Please create all colours in CMYK (ISOcoatedv2/Fogra 39L).
Alternatively special colours in Pantone solid coated will be accepted.
Regarding Pantone colours there may be colour differences,
as not all colours can be printed.

Lettering:

All letterings have to be converted into paths or, in case of printed matters,
need to be completely embedded in the PDF File.

Bleed differences:

5mm Bleed

Crop marks:

None!

Formats in between /resolution:

1:1	100-150 dpi
1:2	200-300 dpi
1:4	400-600 dpi
1:10	1000-1500 dpi

Plot files/self-adhesive foils:

Please deliver line art graphics (In-/Outline).
Fonts converted to paths

Spelling mistakes:

We assume no liability for spelling mistakes and wrong punctuation marks.

File transfer:

Please send us an email so we can send you the project-related access data.
